NAME: V Vishwa Teja ID NO: 2520090033

Skill-3:

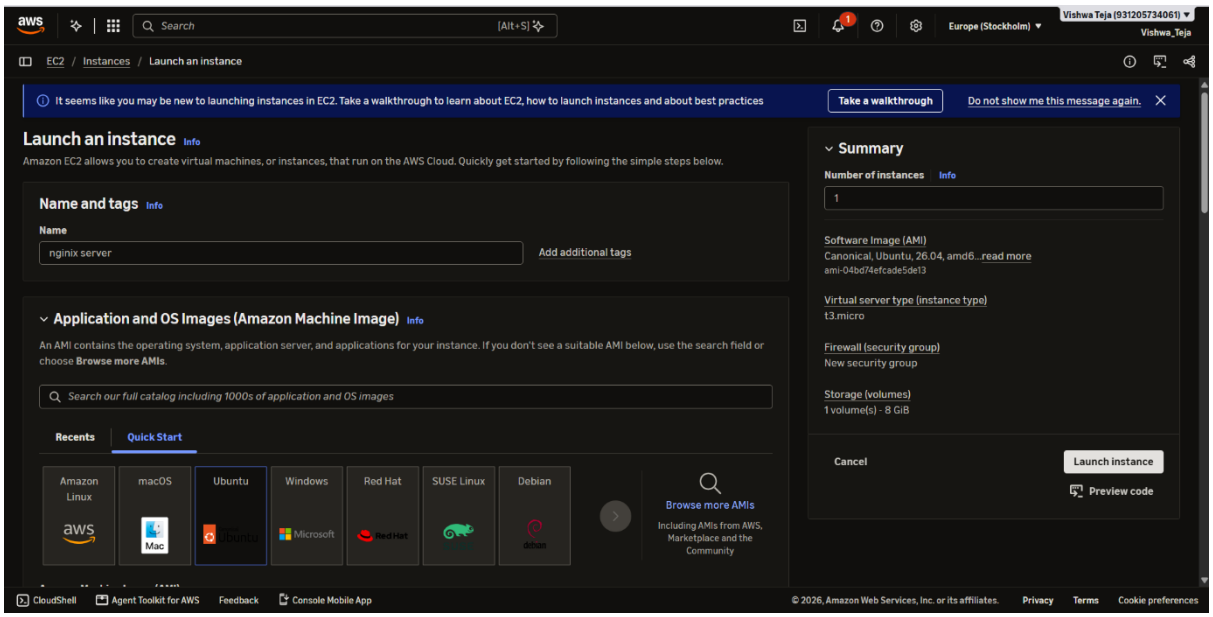

Step-1:

Login into AWS console and in the search bar search for EC2 and go to Instances and click launch Instances.

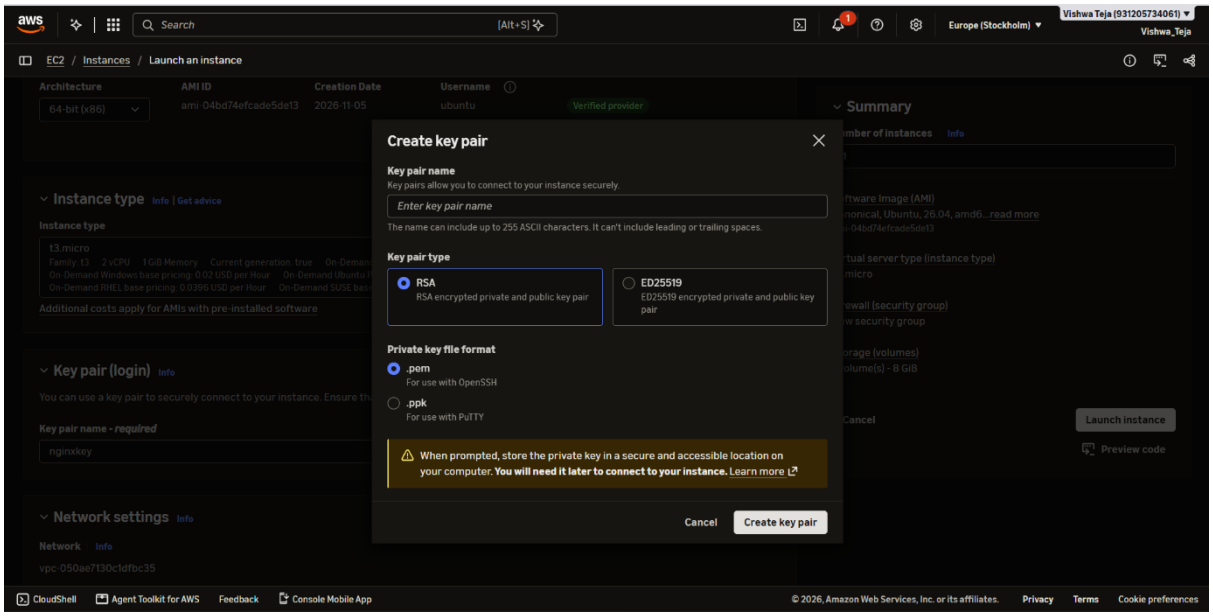

Step-2:

Give the server name as nginx and select ubuntu.

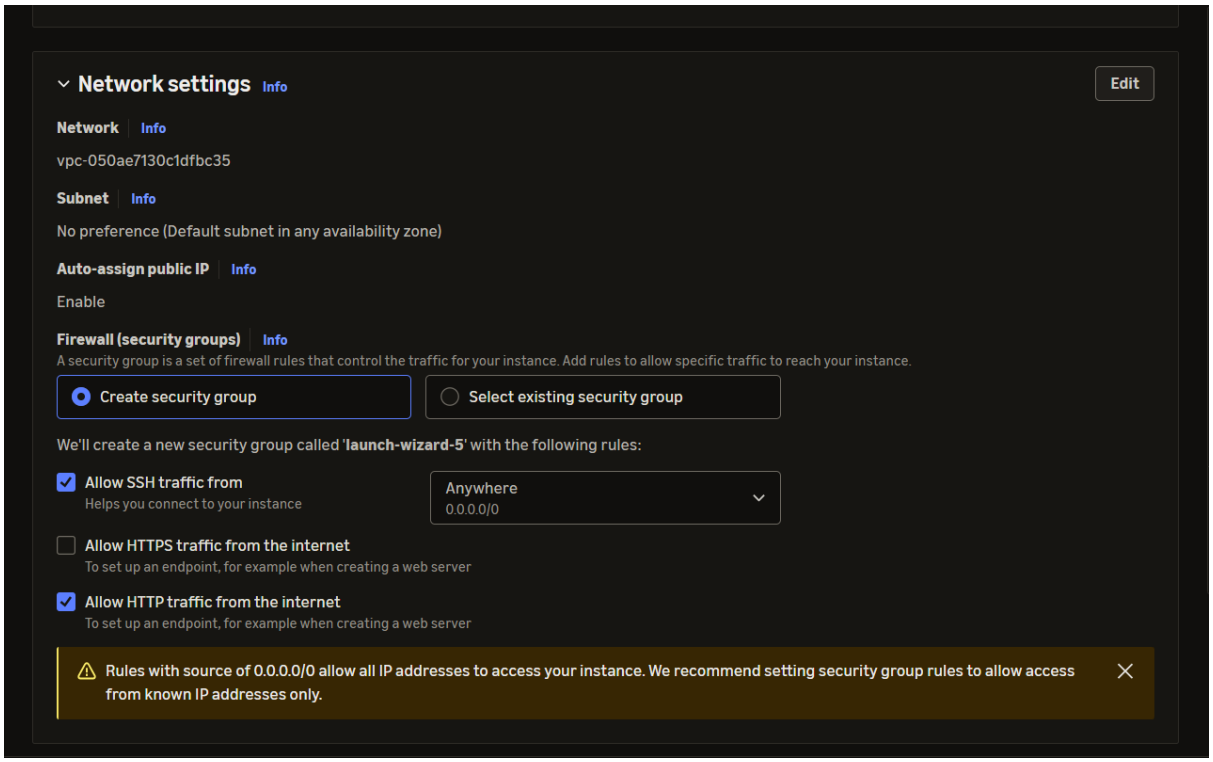

Step-3:

Now create a new key pair.

Step-4:

Now select the HTTP traffic.

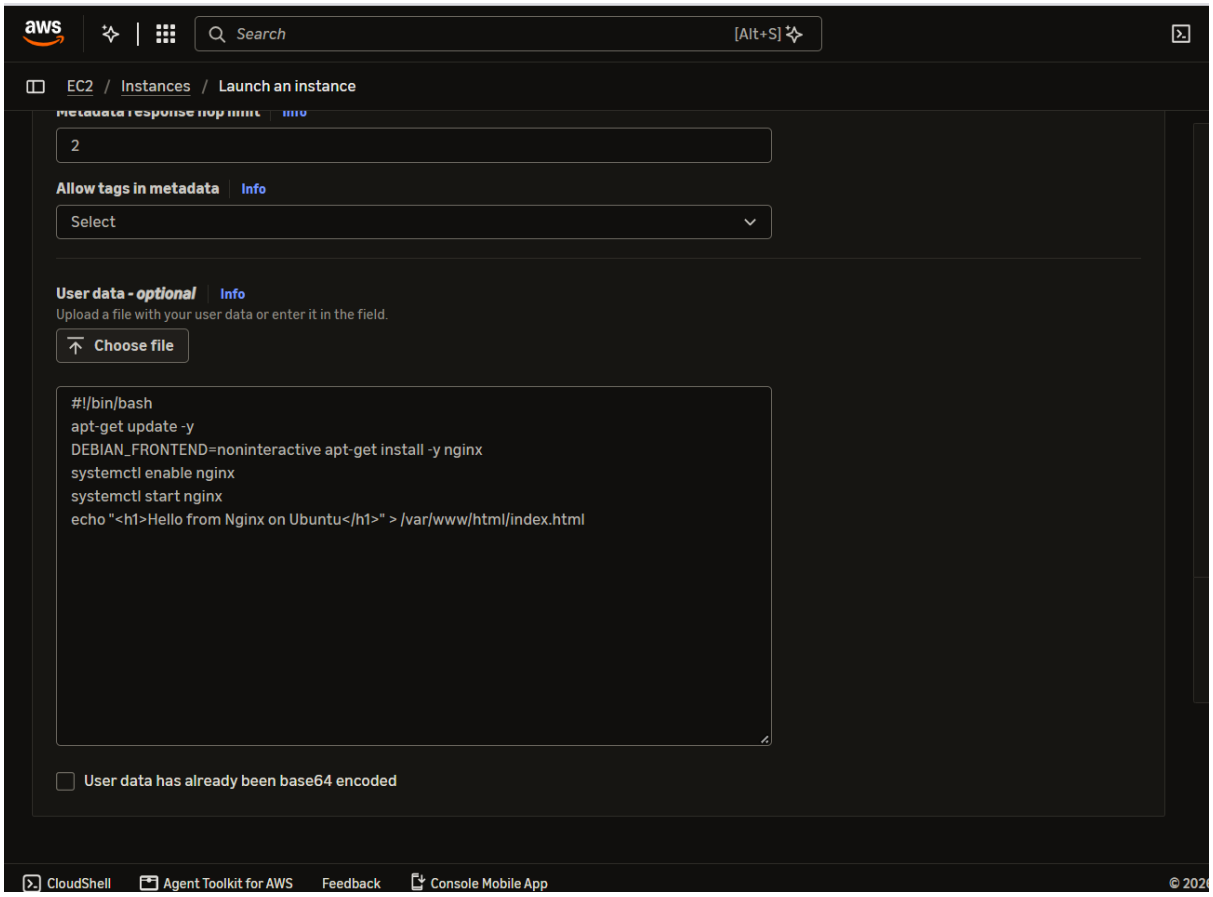

Step-5:

Now we have to write the code in Advanced Details.

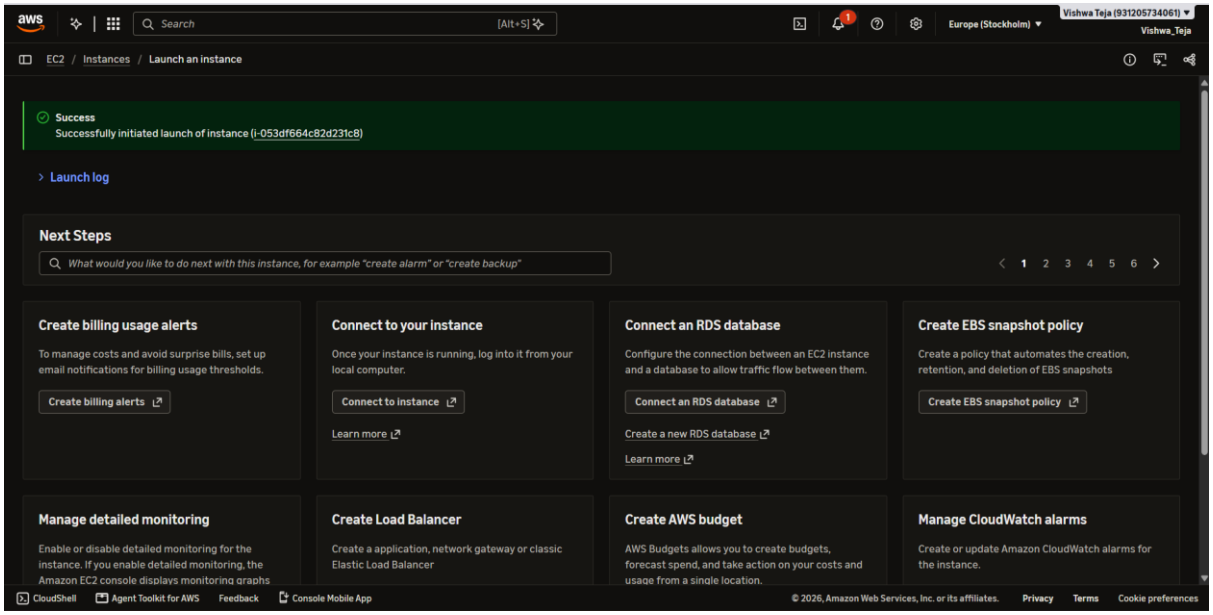

CODE:

```
#!/bin/bash
apt-get update -y
DEBIAN_FRONTEND=noninteractive apt-get install -y nginx
systemctl enable nginx
systemctl start nginx
echo "<h1>Hello from Nginx on Ubuntu</h1>" >
/var/www/html/index.html
```

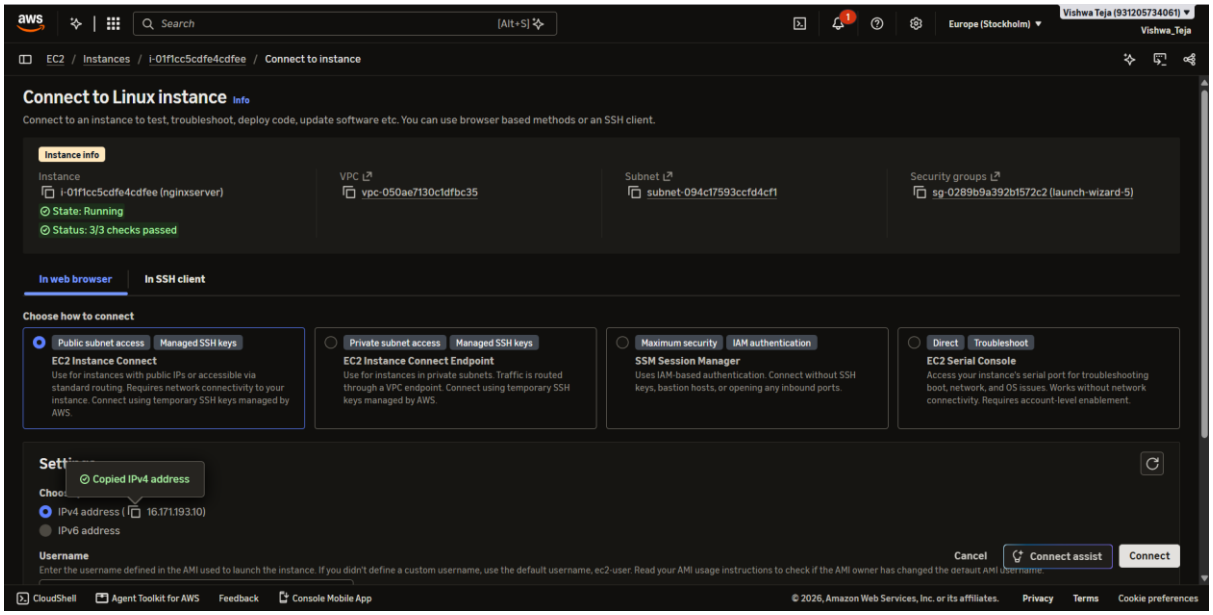

Step-6:

Now click launch instances and it will show a successful message.

Step-7:

Now select the server you have created and click connect and it should pass the 3/3 checks and copy the IP Address.

Step-8:

Now open a new tab and type http:// and the IP Address.

Step-9:

Now you can see the output.

Hello from Nginx on Ubuntu
