NAME: V Vishwa Teja ID NO: 2520090033

Skill-4:

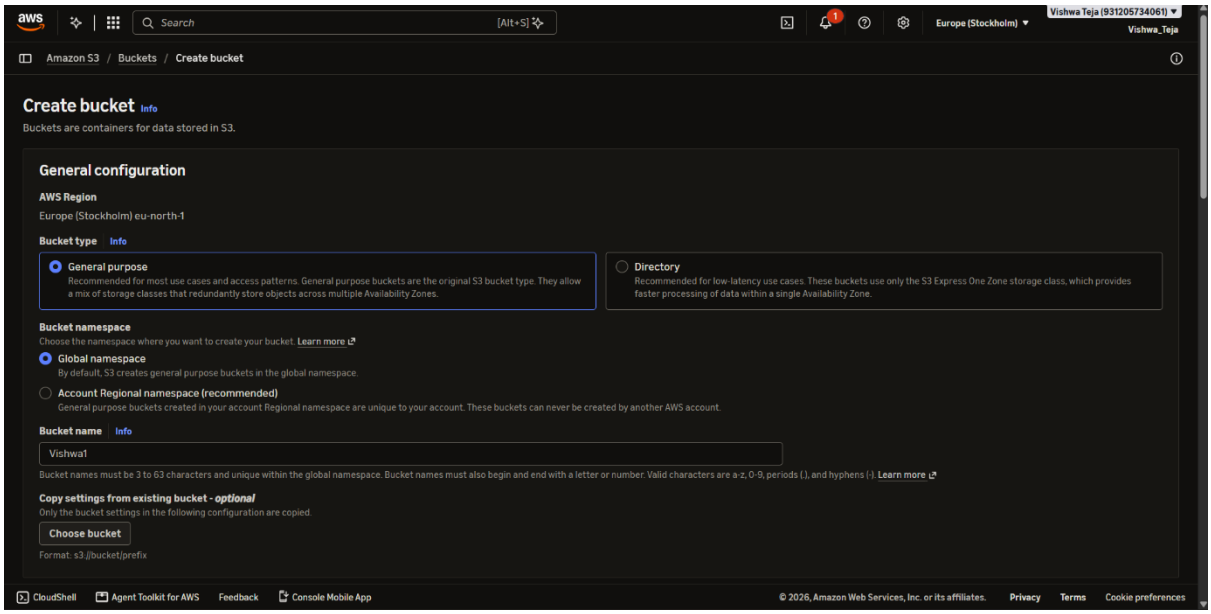

Step-1:

Login into your console and search for S3 and click on it.

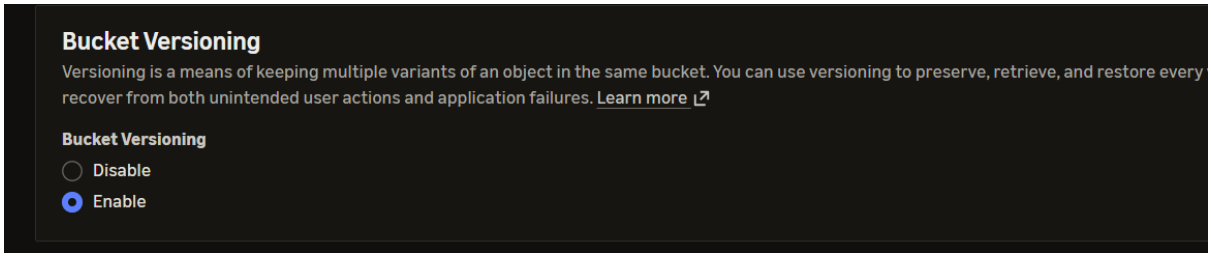

Step-2:

Now click create Bucket and give it a name as studentsvm3.

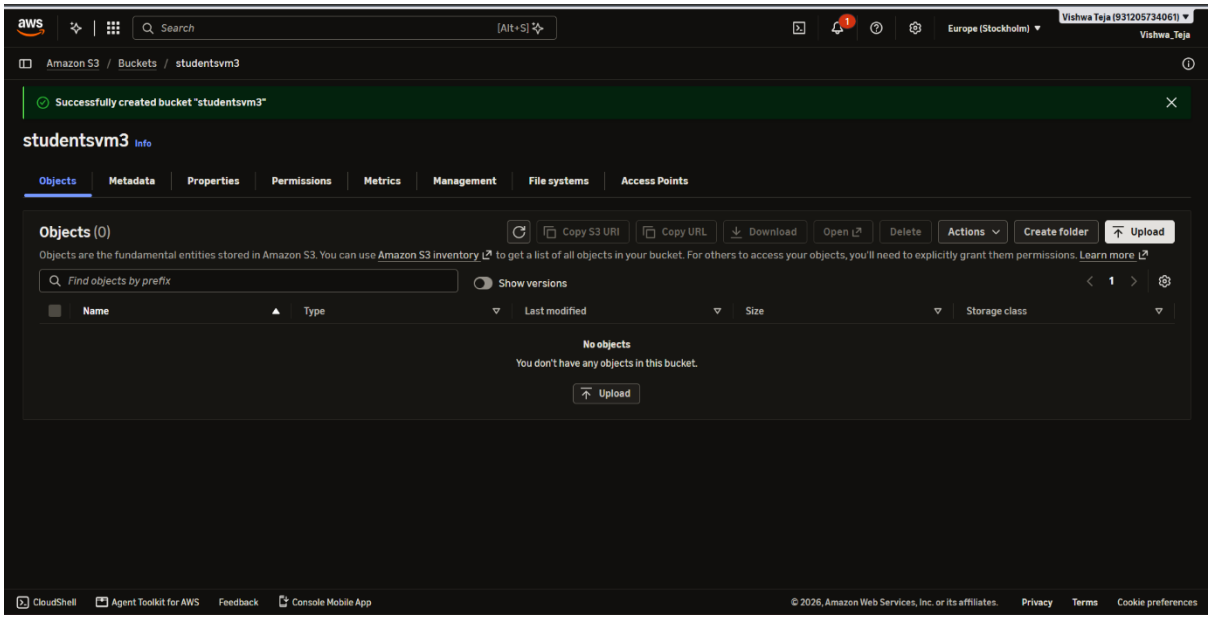

Step-3:

Now in Bucket Versioning select Enable.

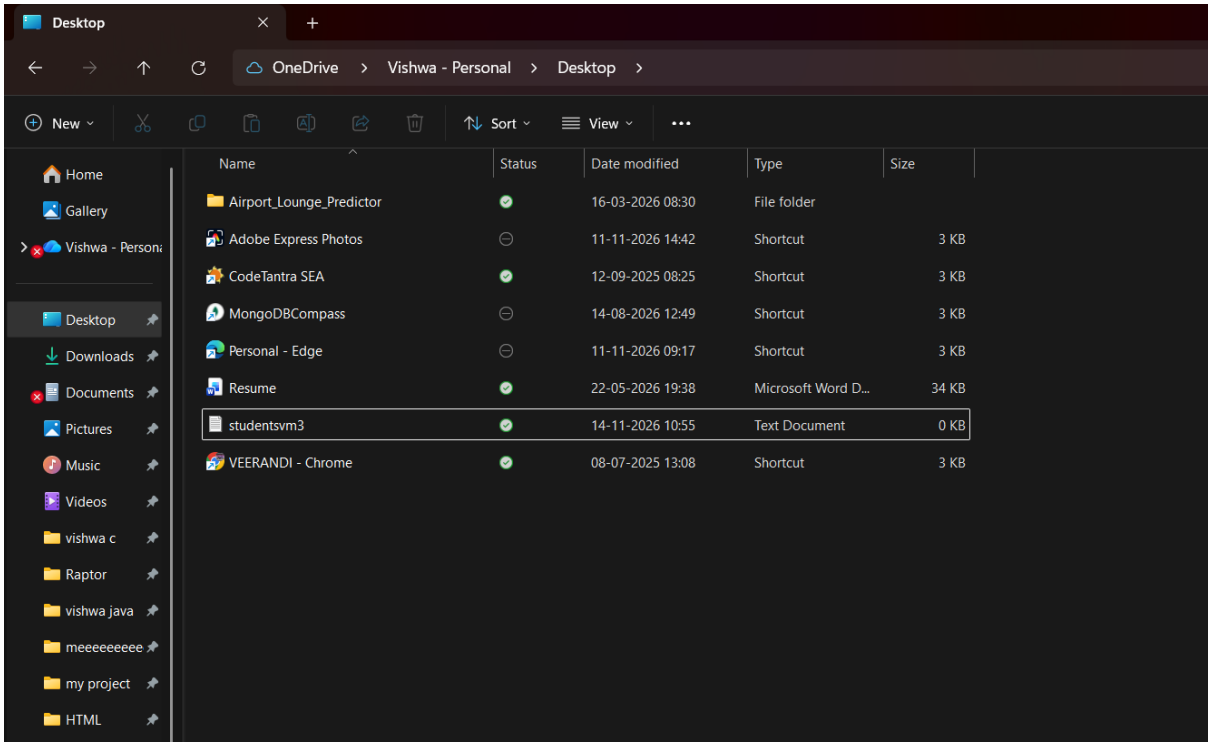

Step-4:

And click create you will see a successful message.

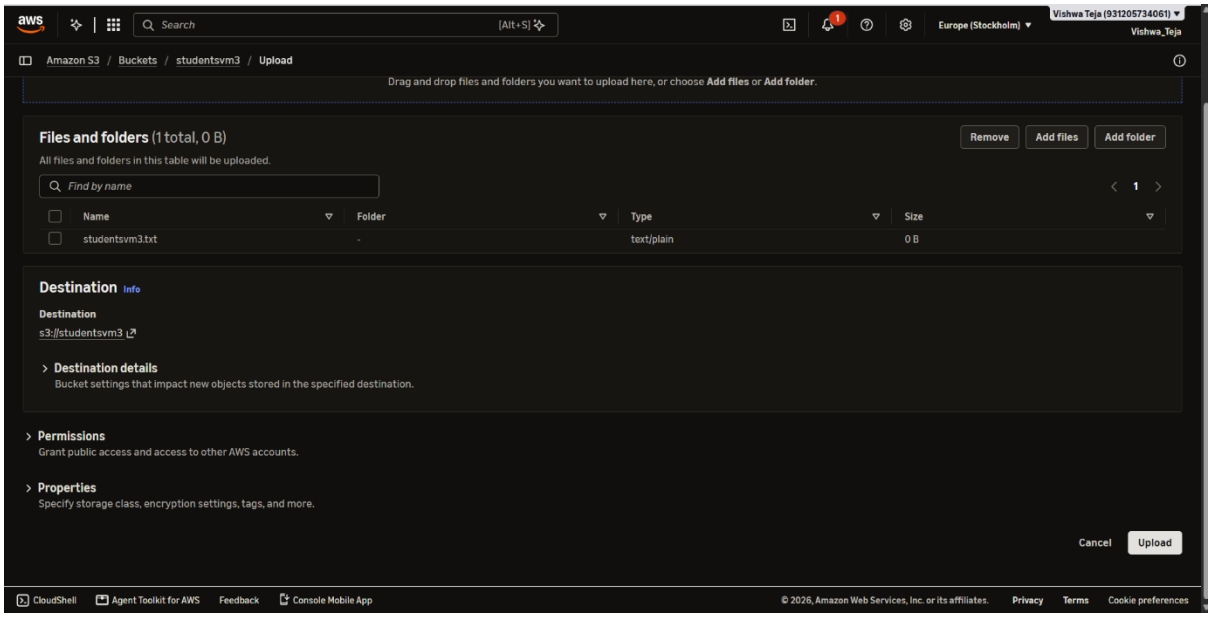

Step-5:

Now go to your desktop and create a text document and name it as studentsvm3 and in it write the text as THIS IS SKILL-4.

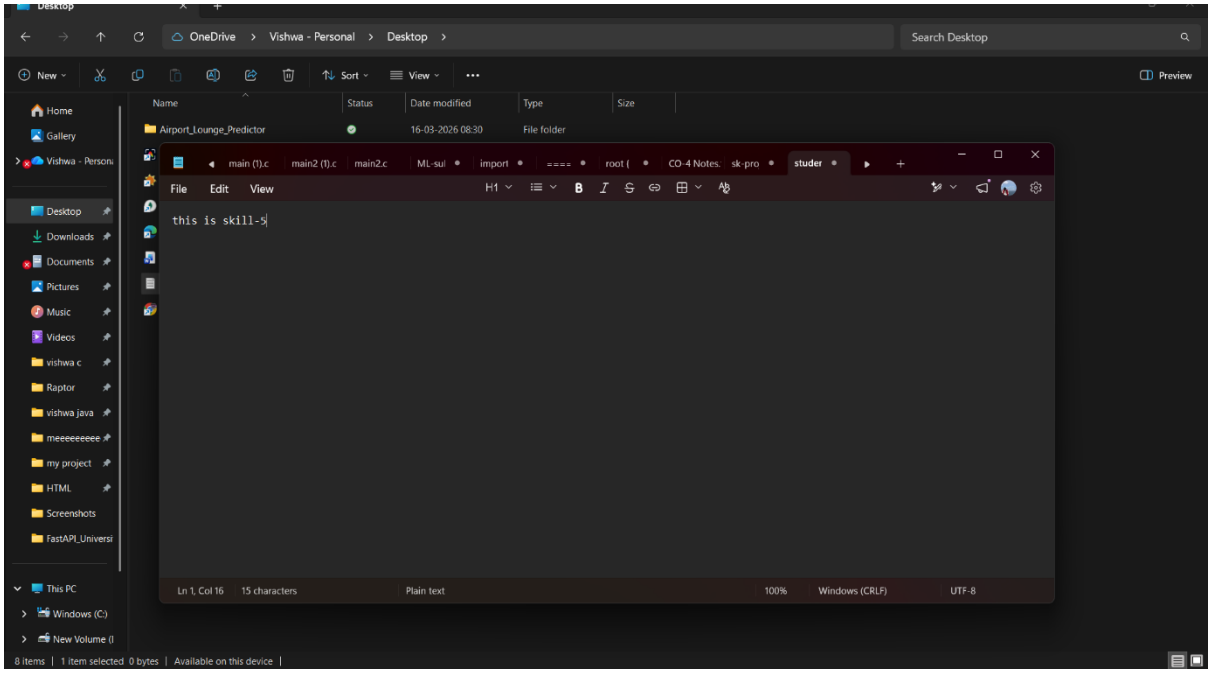

Step-6:

Now in console click upload and add files and upload the text document you have created.

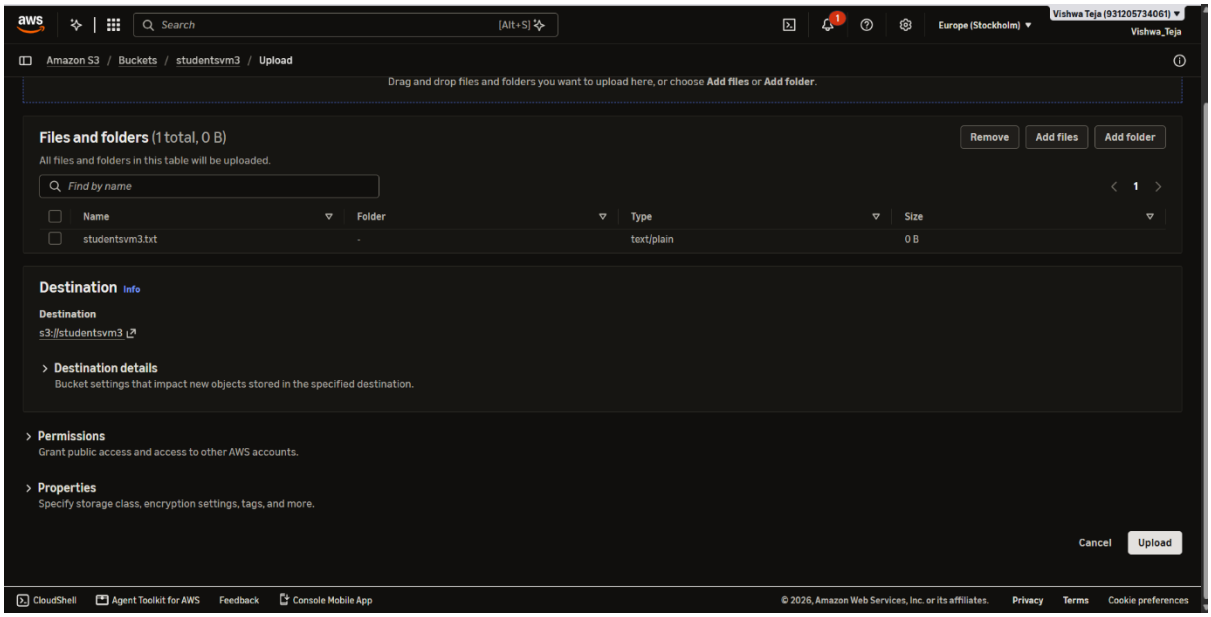

Step-7:

After uploading the file go back to the desktop and edit that file’s text as THIS IS SKILL-5.

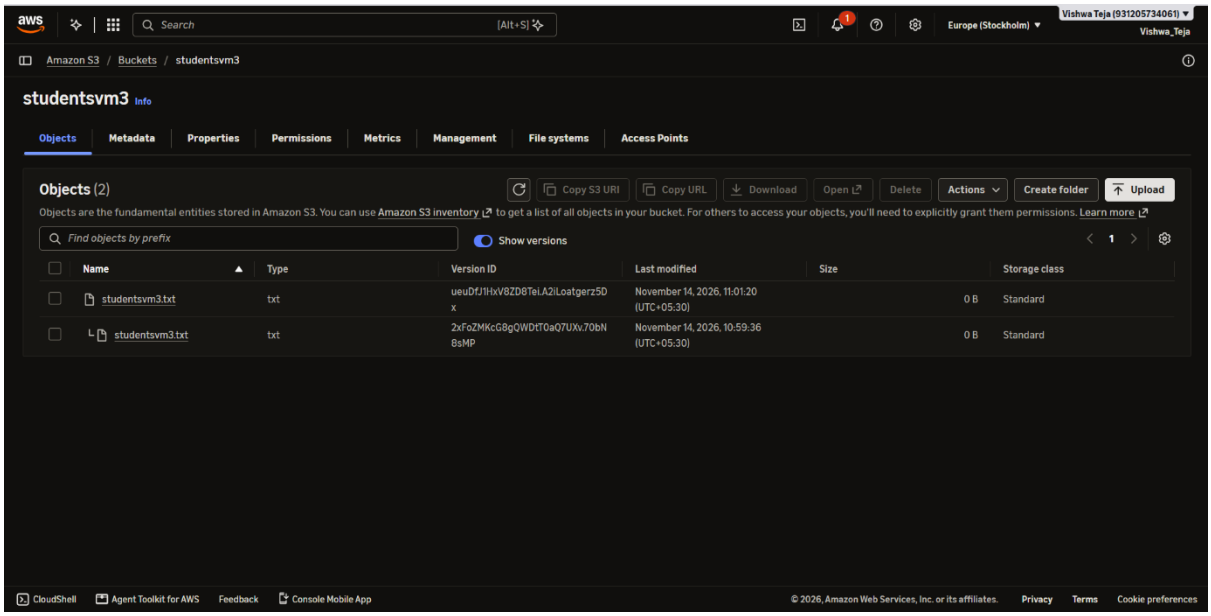

Step-8:

Now again in the console upload the same file again.

Step-9:

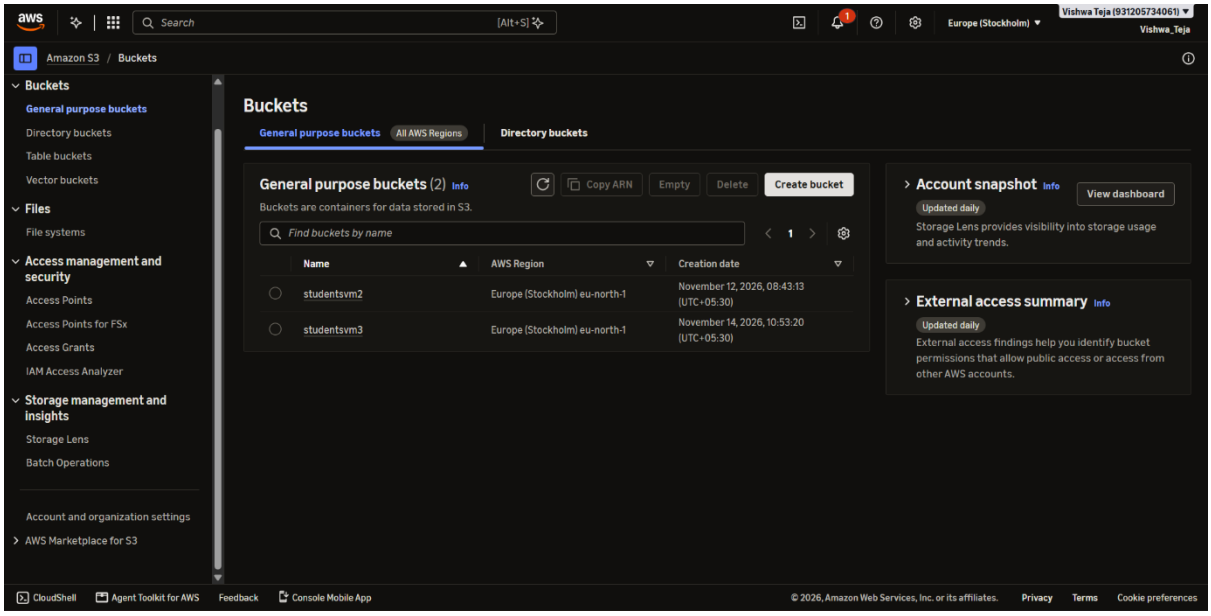

In final page you should turn on the show versions.

Creation of Lifecycle:

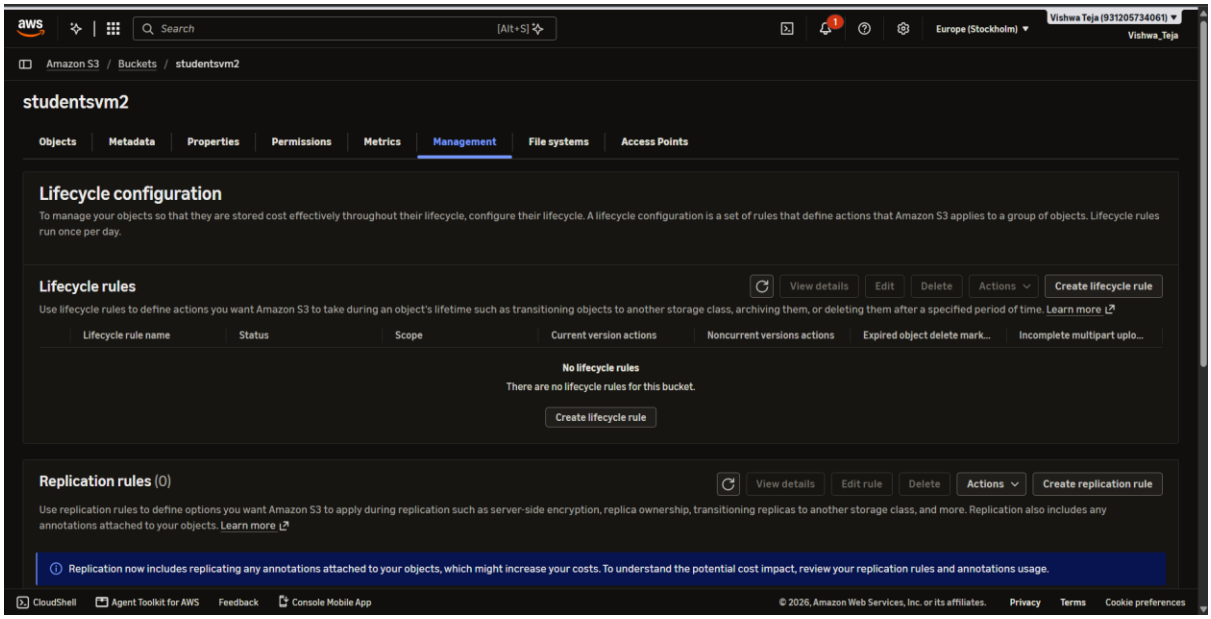

Step-1:

In S3 buckets go to general purpose buckets and click on the bucket.

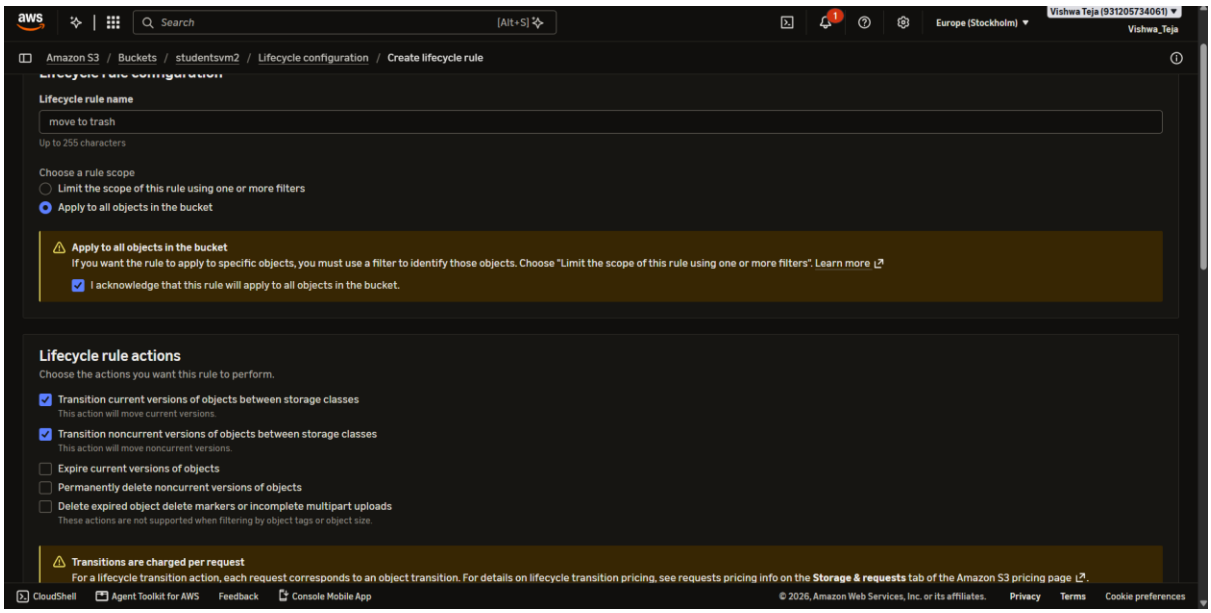

Step-2:

Go to the management on the top and click on create lifecycle rule.

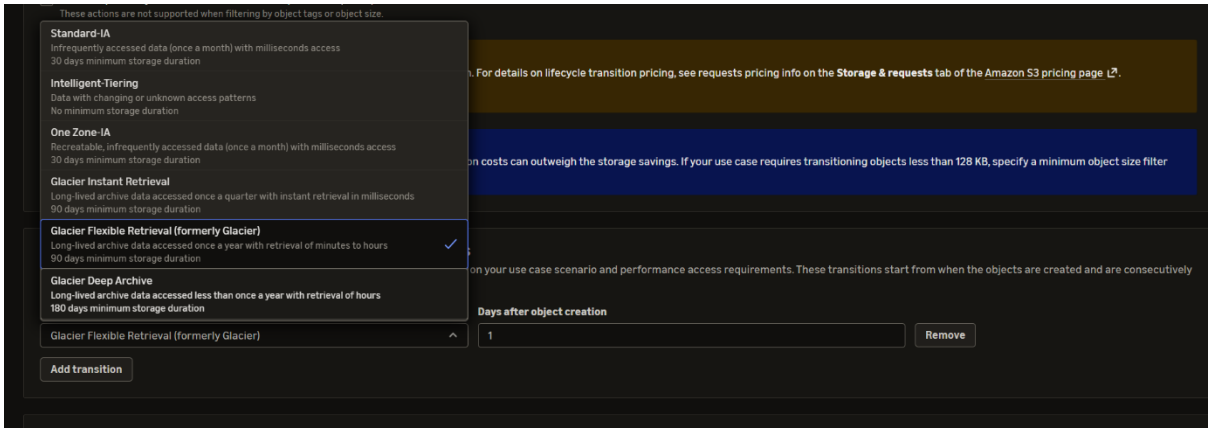

Step-3:

In lifecycle rule name give it as move to trash and select apply to all and in lifecycle rule action select the first 2 check boxes.

Step-4:

Now select the glacier flexible and give the days as 1 for both the options.

Step-5:

Now you will see the successful message.
